

IPG Automotive Remains on the Expansion Path

Karlsruhe-based company opens new office in Stuttgart

Karlsruhe, December 1, 2020

IPG Automotive is experiencing continued growth despite the COVID-19 crisis. On December 1, the technology leader in virtual test driving strengthened its national presence by opening a new office in Stuttgart.

Innovative technologies, intelligent systems as well as shifting societal conditions push more and more OEMs to use simulation methods to master the increasing system complexity and save costs and time. The new office in Stuttgart reflects this development and allows for optimal on-site customer support.

“We are driven by the consistent advancement of our innovative products. Our local presences around the world enable us to strengthen our customer relations and to offer customers ideal support with applications in the areas of ADAS, autonomous vehicles, powertrain development or vehicle dynamics. Therefore, I am looking forward to provide our customers with even more direct and broader support from our new office in Stuttgart for seamless development, calibration, testing and validation of mechanic and mechatronic systems in the full vehicle“, says Dr. Alexander Ahlert, Manager of the Stuttgart office.

About IPG Automotive GmbH

As a global leader in virtual test driving technology, IPG Automotive develops innovative simulation solutions for vehicle development. Designed for seamless use, the software and hardware products can be applied throughout the entire development process, from proof-of-concept to validation and release. The company's virtual prototyping technology facilitates the automotive systems engineering approach, allowing users to develop and test new systems in a virtual whole vehicle.

IPG Automotive is an expert in the field of virtual development methods for the application areas of Autonomous Vehicles, ADAS, Powertrain and Vehicle Dynamics, committed to providing support to master the growing complexity in these domains. Together with its international clients and partners, the company is pioneering simulation technology that is increasing the efficiency of development processes.

By taking real test driving into the virtual world as a complement to on-road testing, IPG Automotive contributes significantly to technical progress and shares in shaping the mobility of tomorrow with regard to comfort, safety, economic efficiency and environmental friendliness.

In addition to the company headquarters in Karlsruhe, Germany, IPG Automotive provides innovative development services to its customers and partners at the national offices in Braunschweig, Frankfurt, Stuttgart and Munich as well as in China, France, Japan, Korea, Sweden, the UK and the USA.
